EDUCATION

Scaler School of Technology

Bachelor's in Computer Science

India

2024 – Present

BITS Pilani

B.Sc. in Computer Science(Online)

India

2024 – Present

EXPERIENCE

GirlScript Summer of Code 2024 - Extended Edition

Contributor

Remote

2024

- Contributed to open-source projects by fixing issues and improving existing codebases
- Collaborated using Git and GitHub workflows including pull requests and version control

Hacktoberfest 2024

Open Source Contributor

Remote

2024

- Actively contributed to open-source repositories during Hacktoberfest
- Strengthened collaboration and code review skills using Git-based workflows

PROJECTS

BidSmart AI (RFP Automation for EY) | *AI, NLP*

- Built an AI-powered system to automate RFP (Request for Proposal) analysis
- Designed pipelines to extract, structure, and summarize key requirements from large documents
- Improved efficiency in proposal workflows by reducing manual effort and processing time

NutriScan 2.0 (Food Label Analyzer) | *React, Node.js, MongoDB, OCR, Gemini API*

- Developed a full-stack AI application to analyze food ingredient labels using OCR
- Integrated Google Gemini API to evaluate 150+ ingredients and generate health scores
- Built personalized features including allergy tracking, smart recommendations, and AI chat assistant
- Optimized data processing and response time for real-time analysis

NEUEat – Food Delivery System Backend | *Spring Boot, React, MongoDB, JWT, REST APIs*

- Built a production-grade food delivery backend supporting Customer, Restaurant, and Driver roles with role-based access control
- Designed 50+ RESTful APIs with JWT authentication, pagination, filtering, and secure data handling
- Implemented order lifecycle management (PENDING → DELIVERED), reviews ratings, and real-time role-based workflows
- Integrated Swagger/OpenAPI for API documentation and testing, improving developer usability and debugging efficiency

TECHNICAL SKILLS

Languages: Java, JavaScript

Core: Object-Oriented Programming, Data Structures and Algorithms

Technologies: React, Node.js, MongoDB

Tools: Git, GitHub

CODING PROFILES

LeetCode & CodeChef: Consistent problem solver with strong focus on Data Structures and Algorithms

ACHIEVEMENTS

- Participated in 10+ hackathons, building and presenting problem-solving solutions in team environments
- International Taekwondo player (Black Belt) with competitive experience, demonstrating discipline and resilience
